

Practicing with Python■

Programming■

I have been learning a new programming language called Python. It is quite interesting and I am developing some new s■

■  
What I have found is that the initial language is quite easy to pick up but learning new modules, which are like libr■

■  
My Winter Break project was to develop a GUI interface for one of these modules pyPDF which is a lot like the commar■

■  
It has been fun though, frustrating at times but it keeps me from being bored out of my mind and it is interesting. ■

■  
...Python, modules.■
